$$g * f = \int_{-\infty}^{\infty} \int_{-\infty}^{\infty} f[k-i, (-i)] g[i, j] didj$$

 $f * p = \int_{-\infty}^{\infty} \int_{-\infty}^{\infty} p[i-m, j-n] f[m, n] dm dn$

$$= \int_{-\infty}^{\infty} \int_{-\infty}^$$

Yes, this extends to discrete images.
